TECHNIQUE

Stage area and technical constraints

Flat surface, with 6mx4m of floor area and 5m of ceiling height in 2 artists version.

If you want to add an aerial silk act, a stop point at more than 5m from the ground has to be available; or, a 6m x 6m x 6m space has to be cleared in order for us to install our free standing aerial frame.

However it is possible to perform the show on a **smaller stage area**, but some parts will have to be changed and some techniques removed.

Sound and lighting

The artists have their own HF micros that have to be connected to a control room.

The music will be supplied on USB key, CD or tablet computer.

Lighting:

- Warm front lighting for the whole stage
- Some down lights
- Ideally, some varied lighting atmospheres

The artists can come with their own sound/lighting system and a light technician.

Installation time

1h of installation and 1h of the artists' preparation (1 additional hour if aerial act).

Provide for 1 more hour if Eklabul handles the sound/lighting system.
